SYLLABUS

Discipline: Web Development

Number of credits: 4 Term: Spring 20___

Instructors full name: Bobur Mukhsimbayev, Aibek Kuralbayev

| Personal Information | Time and pla | ce of classes | Contact information |
|----------------------|---------------------------|-----------------------------|-----------------------|
| about the Instructor | Classes | Office Hours | e-mail |
| Bobur Mukhsimbayev | According to the schedule | Room 184, will be appointed | b.mukhsimbaev@kbtu.kz |
| Aibek Kuralbayev | According to the schedule | Room 184, will be appointed | a.kuralbaev@kbtu.kz |

COURSE DURATION: 4 credits, 15 weeks

COURSE DESCRIPTION

This course is designed to introduce students to modern Web Development. Especially, for client side - Angular and for server side - Django frameworks.

Angular is a platform and framework for building client applications in HTML and TypeScript. Angular is written in TypeScript. It implements core and optional functionality as a set of TypeScript libraries that you import into your apps.

Django is a web development framework that assists in building and maintaining quality web applications. Django helps eliminate repetitive tasks making the development process an easy and time saving experience. This course gives a complete understanding of Django.

This course is designed for developers who want to learn how to develop quality web applications using the smart techniques and tools offered by Angular and Django. Besides this, students will learn how to solve real world problems from industry.

COURSE OBJECTIVES

The objective of this course is to provide the student with real world tasks from industry and find the best solution for them and work in a team.

COURSE OUTCOMES

In the end of the current course students will know:

- HTML(5), CSS(3), JavaScript
- Node Package Manager (npm)
- Angular Modules, Components, Services, Interfaces

- JavaScript, TypeScript
- Have an intermediate skill level of Python programming.
- Web application architecture, how web works
- Understand steps of web app development
- Build websites using Django
- How to create a local development server from scratch
- How to build your own browsable, self documenting REST API
- Working with Django Templates

COURSE POST REQUISITES

Knowledge and skills obtained during study of course Web Development are used in following courses: Programming Technologies, Object-Oriented Programming, Foundation of Web development.

| Week | Class work | Laboratory works | | | | | |
|------|---|------------------|-----------------------|--|--|--|--|
| | Topic | Lecture | | | | | |
| 1 | Introduction to Web Development: What is the website? How does the Web work? Technologies in both client and server side Framework & Library Back-End framework comparison Basic techniques for scaling What is the API? | 1 | 1. Laboratory work #1 | | | | |
| 2 | Web development roadmap Web development roadmap HTML Elements Element attributes HTML Forms HTML Forms Inputs CSS HTML5/CSS3 | 2 | 1. Laboratory work #2 | | | | |
| 3 | JavaScript • JavaScript Standards | 3 | 1. Laboratory work #3 | | | | |

| | Deta Timos | | |
|-----|---|----|---|
| | Data Types | | |
| | Variable scoping | | |
| | Functional Programming | | |
| | • JSON | | |
| | • DOM | | |
| | Event handling | | |
| | HTML Element manipulating | | |
| 4 | Introduction to Angular. | 4 | 1. Laboratory work #4 |
| | What is the Goal of Angular? | | |
| | Angular CLI | | |
| | JavaScript & Typescript | | |
| 5 | Angular Components | 5 | 1. Laboratory work #5 |
| | Properties | | |
| | Data Binding | | |
| | Templates | | |
| | Styles | | |
| | Life-cycle hooks | | 1 |
| 6 | Modules, Router Module Getting Data From RESTful APIs | 6 | 1. Laboratory work #6 |
| | Reactive Programming | | |
| | | | |
| | Services | | |
| | Observables | | |
| 7-8 | Quiz 1 | | Laboratory work defense |
| 9 | Introduction to Python PL, Django: | 9 | 1. Laboratory work #7 |
| | Python programming language | | 2. Project |
| | What is Django? | | |
| | Django project structure | | |
| | Django configurations file | | |
| | (settings.py) | | |
| | Django router file (urls.py) | | |
| | Django Web Server Gateway | | |
| | Interface (wsgi.py) | | |
| 10 | Building REST APIs With Django REST | 10 | 1. Laboratory work #8 |
| | Framework: | | 2. Project |
| | Fundamentals of Basic REST API | | |
| | Design REST API Architecture | | |
| | RESTAPTARMILECTURE Grouping API URLs | | |
| | Grouping AFT ORESVersion Your API | | |
| 11 | Generic Views, Sessions, | 11 | 1. Laboratory work #9 |
| | Users, and Registration | | 2. Project |
| | Using Generic Views | | |
| | Coning Content views | | |
| | Generic Views of Objects | | |
| | Generic Views of ObjectsDjango's Session Framework | | |
| | Generic Views of ObjectsDjango's Session FrameworkUsers and Authentication | | |
| 12 | Generic Views of Objects Django's Session Framework Users and Authentication DRF Serialization | 12 | 1. Laboratory work #10 |
| 12 | Generic Views of Objects Django's Session Framework Users and Authentication DRF Serialization Creating a Serializer class | 12 | 1. Laboratory work #10 2. Project |
| 12 | Generic Views of Objects Django's Session Framework Users and Authentication DRF Serialization Creating a Serializer class Working with Serializers | 12 | • |
| 12 | Generic Views of Objects Django's Session Framework Users and Authentication DRF Serialization Creating a Serializer class Working with Serializers Types of Serializer classes | 12 | • |
| 12 | Generic Views of Objects Django's Session Framework Users and Authentication DRF Serialization Creating a Serializer class Working with Serializers | 12 | • |

| | Writing regular Django views using | | |
|-------|--|----|--|
| | our Serializer | | |
| 13 | DRF Requests and Responses: Request objects Response objects Status codes Wrapping API views Pulling it all together Authentication: Adding endpoints for our User models Adding required permissions to views Adding login to the Browsable API Authenticating with the API | 13 | Quiz 2 1. Laboratory work defense |
| 14 | Interacting with a Database: Models, The Django Administration Site: | 14 | Quiz 3 1. Project defense (front part) |
| 15 | Project defense | | Quiz 4 1. Project defense 100% |
| 16-17 | Final Exam | | , |

COURSE ASSESSMENT PARAMETERS

| Type of activity | Final scores | | | | | | |
|---------------------------------|--------------|--|--|--|--|--|--|
| Quiz 1 (Lab defense) | 20% | | | | | | |
| Quiz 2 (Lab defense) | 20% | | | | | | |
| Quiz 3 (Project defense: front) | 7% | | | | | | |
| Quiz 4 (front + back) | 13% | | | | | | |
| Final exam | 40% | | | | | | |
| Total | 100% | | | | | | |

Criteria for evaluation of students during semester:

Academic Policy

KBTU standard academic policy is used.

- Cheating, duplication, falsification of data, plagiarism, and crib are not permitted under any circumstances!
- Attendance is mandatory.

Attention. Missing 20% attendance to lessons, students will be taken from discipline with filling in F (Fail) grade.

Students must participate fully in every class. While attendance is crucial, merely being in class does not constitute "participation". Participation means reading the assigned materials, coming to class prepared to ask questions and engage in discussion.

- Students are expected to take an active role in learning.
- Written assignments (independent work) must be typewritten or written legibly and be handed in time specified. Late papers are not accepted!
- Students must arrive to class on time.
- Students are to take responsibility for making up any work missed.
- Make up tests in case of absence will not normally be allowed.
- Mobile phones must always be switched off in class.
- Students should always be appropriately dressed (in a formal/semi-formal style).
- Students should always show tolerance, consideration and mutual support towards other students.
